How should the idea/business earn money?

Aqua culture is one of the leading business here in Zambia ????????,so I believe once it's done, it's a highest income generation project.also with the land I have once developed for the in the construction of lodges more money can be made.

At what stage is the idea / business at the moment?

The said land for aqua culture is in its 80%stage complete.remaining just the tractor to start constricting ponds.of which this is where I need capital.

What do you need?

Assistance in completing my project and an investor who can develop the undeveloped land.assistance in the needs of money or any means to help me complete the project
