

BUSINESSES INVESTMENT

Location of the investment: **Pretoria, South Africa**

Publication: **05.02.2020 08:12**, no. of the advertisement: **1065**

What is your idea / business and to whom is it addressed?

My idea is to open a classy restaurant and sell beverages within the establishment. In my township there is no such so my aim is to bring class and a secured drinking place in my township. 90% of the township are young adults and are out to have fun. I already have the place to build the establishment, I just need funding to start building.

How should the idea/business earn money?

As a restaurant that sells food and beverages, people come in to buy food or beverages, chill, and listen to good music. And the business will make money fast as there is no other business like that in my area. People buy food in one place then go to another for beverages, so my business idea is to bring that all up in one place.

At what stage is the idea / business at the moment?

My business is on paper but I already got the land to build and bought that. I just need funding to start building, buy furniture, and just fully establish it.

What do you need?

Am looking for a partner to invest in the business R1000000 for 60% shares.
