

B&C MEDICAL CODING AND BILLING

Location of the investment: **Salt Lake City, United States**

Publication: **01.03.2020 02:44**, no. of the advertisement: **1524**

What is your idea / business and to whom is it addressed?

My business idea is to do a Medical Coding and Billing Business. Where we would be the middleman for the insurance companies and the doctors/providers to make sure they were billed correctly. Also collect on past due patients Bill's! What would make us stand out is we wouldn't charge a start up fee with the doctors/providers we would do a certain percentage from each patients bill.

How should the idea/business earn money?

Well when you are working in the healthcare industry everyone has to go to the doctors and there will always be Medical Bill's. So I figured if we did this nationwide this business could be a billion dollar business if not even more revenue. That's including huge hospitals that are nationwide.

At what stage is the idea / business at the moment?

I have only gotten the LLC license

What do you need?

I need \$1.2M for securing a building to get equipment such as computers, monitors and so on. Also to hire employees, advertisement. For traveling and do some presentations for hospitals, clinics and ect. This is billion dollar industry
