Publication: **05.03.2020 09:25**, no. of the advertisement: **1558**

### **What is your idea / business and to whom is it addressed?**

Technology also has impacted the environment, people and the society as a whole. Technology has improved Communication, Transportation, Education & Learning process, Health-Care and many other infrastructure business areas. Business rely on information technology to help them be more productive. This is a career that benefits any business by allowing companies to work more efficiently and to maximise productivity. And with that comes faster communication, electronic storage and the protection of important documentation ETC. These is the reason why we have decided to establish an ICT institution. The name of our bussines is OPTIMIST CHOICE TECHNOLOGIES our dream is to established a well equipped standard computer training institution which will offer many services like internet/ICT related services e.g. website development, softwre development and design,python trianing, ethical hacking, humanoid, hosting maintenance, marketing application development, social marketing analysis, Computer system and database training, and local network area (LAN) management training and a jamb cbt center also a language school that will be teaching at least 4 basic languages e.g. German language, French, Chinese, Italian, and we are targeting to be the number 1 computer and language school in my country. OUR MISSION is to train needy youth to become skilled, productive and creative in computer related courses. To develop a highly successfully and profitable which provides quality training on our community and to become a standard computer training institution not only to the state but also throughout the country and other states and countries where we intend attracting students. OUR VISION is to be the world leading computer institute that will be producing the best students in all area of computer technologies in our country. We are pleading for found in the amount of \$500,000 this will help us to establish the business to the standard we want as well as to get all the necessary equipment needed for the project.giving your agreement to this investment we are proposing a 30% return to your investment over the next five years, I greatly aprecaite your time in reading thro ugh the details of this proposal if you have any further questions please feel free to contact me through the informations provided above. Thank you for your support.
