

PROFITABLE POULTRY PROJECT

Location of the investment: **Tepa, Ghana**

Publication: **17.03.2020 23:35**, no. of the advertisement: **1730**

What is your idea / business and to whom is it addressed?

We run a poultry(layer farm) in the Ashanti region of Ghana where we produce table eggs and meat for sale. We are currently looking forward to scale up our farm and as such looking for any sort of partnership be it equity funding or loans. Additionally, we Also want funds to engage in the trading of chicken feed to other farmers in our area.

How should the idea/business earn money?

With the layer farm our profit comes from the daily sales of eggs when they are reared up to 18 weeks and the sale of their meat when they finish laying at 2 years of age. On the trading of animal feed,we in turn to buy from big importing companies at cheap price and sell them at relatively low prices as compared to the prevailing market prices and offer on-farm delivery of feed to our clients and still make profit. We have designed a detailed business plan which we can share and discussed further with any one interested.

At what stage is the idea / business at the moment?

We have being in operation since 2017 and we are currently at the developmental stage.we are making profit and ploughing it back into the business but not enough to meet our expansion demands.

What do you need?

We need either a loan or equity financing.
