How should the idea/business earn money?

-On your place company will be planted Cannabis. When cannabis grows and through all processes from growing to dry, Company they will be planted new cannabis plants over again on the same spot. -The company takes half from you and the half is yours, you can choose will you sell it for 2 euro per gram company or you can take it for your self if it is legal in your country. In the future, we can expect and more than 2 euros per gram. -But here I suggest selling them and saving money and buy the next place. Average money what you get it from one the plant is around 70-96 euro.
