

## **SAFE FOOD FOR BABY&NBSP;**

Location of the investment: **Bangladesh**

Publication: **21.03.2020 16:54**, no. of the advertisement: **1753**

### **What is your idea / business and to whom is it addressed?**

This project is for giving proper nutrition for poor children. Which will be like all in one and cheaper. Of course it will solve the huge nutrition gaps of them. We prefer B2B. We could sell it through NGO. The investors need to know, we have a large population and have scarcity of land and food. So always our children are suffering from malnutrition and weakness. So it is a good market to sell the item on a regular basis round the year. Because this business covers basic needs of human beings. So you can think about my idea. Thank you.

### **How should the idea/business earn money?**

Hello, I am Mariam from Bangladesh. I wish to work for unprivileged poor children who are suffering from malnutrition. I wish to keep concentrated to introduce nutritious food which covers all food categories like protein, carb, vitamin, mineral etc. with help of selfless-minded investors. Because our government are not so concerned of poor people and their future generation who are covering most part of population in future, who will not be able to be well enough to lead an educated, healthy generation without the help of good people who have ability. Thank you.

### **At what stage is the idea / business at the moment?**

Right now, I am working for the formation and searching data for a realistic business plan.

### **What do you need?**

I need technical support to make all in one nutrients food for baby which should be cheaper and easily available.
