In today's society, 1 in 4 people will suffer from mental health issues. ### **How should the idea/business earn money?**

We would charge a commission to the employer for every employee we place with them

### **At what stage is the idea / business at the moment?**

So far the business is registered, it's got a small website, and I'm growing the databases required.

### **What do you need?**

I need an investor to help me purchase database information and be able to set up a professional website and logo.
