

KIATO HOLDINGS LIMITED

Location of the investment: **Solomon Islands**

Publication: **02.04.2020 09:02**, no. of the advertisement: **1897**

What is your idea / business and to whom is it addressed?

Cement production: We currently have a registered company in Solomon Islands owning huge land mass of limestone that can be processed in to cement. Therefore, we are seeking Investor(s) who wants to make good profit with little risk to mine and process limestone through a cement factory.

How should the idea/business earn money?

The proposal will earn money through quarrying (digging), processing, marketing and selling of cement locally and overseas. Solomon Islands import cement from other countries so this business is in good position to earn big money.

At what stage is the idea / business at the moment?

Not yet started, need an Investor to conduct a feasibility study on limestone sites and if it is viable then we will proceed with the proposal.

What do you need?

I need an Investor(s) or business partner(s) with the financial capacities and machineries to mine and process the limestone into cement.
