What is your idea / business and to whom is it addressed?

This project will be buying and purchasing of properties ie commercial, residential etc. Due to current situation, people are selling off their properties at a cheap price of which this properties will be more valuable in just a few months time give 50% profits of the normal profits. This is extremely innovative.

How should the idea/business earn money?

On buying properties in banks, on cheap prices due to pressure on different owners, it seen that each property purchased is likely to earn profits equivalent to the purchasing price let's say purchasing a property at \$50k can be sold \$100k negotiable.

At what stage is the idea / business at the moment?

I have many cheap properties in my database just need input to buy them and remarket them again.

What do you need?

I need financial support to purchase every cheap properties and secure them
