What is your idea / business and to whom is it addressed?

Free Energy Power Generator. dedicated for domestic and industrial use. It starts from 10 KW up 1 GW. The consumers will become independent and they will no longer need connection to the public gas network and/or to the public electricity network.

How should the idea/business earn money?

The market for these Free Power Generators is unlimited. All the house owners want free electricity and heating, so these Generators are exactly what they need, being one of the most wanted products on the market.

At what stage is the idea / business at the moment?

The schematic of the Free Power Generator is ready. The next step is to perform the operational tests.

What do you need?

I'm looking for a partner in order to perform the operational test, to manufacture and to sell worldwide these Free Power Generators.
